In this online event we'll be launching our new guidance packed with information on how human factors as a discipline can help address Equality, Diversity and Inclusion (EDI) issues.

You'll learn:

- How human factors can support the different protected characteristics under the Equality Act 2010.
- How human factors techniques and approaches contribute to EDI by increasing buy-in and engagement.
- How storytelling of lived experiences helps build a stronger sense of empathy.

Who will this be of interest to?

Are you an EDI or human factors professional eager to learn more about the relationship between these two disciplines? Are you a policy maker? Are you involved in dealing with human resources, UX and workplace issues that touch on EDI? If so, this webinar will be of interest to you.

About the presenters

Courtney Grant is a Senior Human Factors Engineer with twenty years' experience across industry, consultancy and public service.

ERGONOMICS & HUMAN FACTORS 2022

ALL DAY

ABOUT US

With the help of our members, the Chartered Institute of Ergonomics & Human Factors organises and runs a range of events each year, helping those interested in the discipline to meet, learn and discuss. Face-to-face events include visits and tours by our Regional Groups, and larger events featuring presentations and workshops in specific sectors. Our annual Ergonomics & Human Factors conference showcases the latest and best research and practical applications. For more information about the Institute, including our other activities and how to become a member, go to our main website at www.ergonomics.org.uk.
